

## BlazeCast<sup>®</sup> for Food Services

The world's most successful restaurant chains rely on Benbria BlazeCast<sup>®</sup> to improve brand loyalty, enhance operational performance and increase customer satisfaction. BlazeCast is an award-winning, intelligent notification and incident management system that enables organizations to automate and streamline communications across a wide range of mediums and devices to employees, customers and targeted groups.

APPLICATION NOTE

"Benbria Blazecast gives us the ability to quickly respond to things that matter to our customers – a timely response to customer satisfaction issues."

- Fortune 1000 customer

Restaurant communication is essential to building and maintaining customer loyalty. Retention is important as the cost of acquiring new customers is much greater than the cost of maintaining existing customer relationships. BlazeCast enables restaurants to

build and maintain their powerful brand with advanced communications technology that ensures accountability, actionability, escalation and faster delivery of vital information.

With Benbria, restaurants lower response times to customer impacting issues and improve productivity via streamlined two-way, cross-media communication.

### Benefits

#### Increase Customer Satisfaction

- » Promptly resolve customer impacting issues with intelligent communications that garner feedback, acknowledgement and closure.

#### Maximize Business Processes

- » Utilize customized incident and task management templates to improve business processes and ensure corporate policies are being followed.

#### Optimize Operational Efficiencies

- » Notify key stakeholders across a variety of mediums and devices regarding recalls, product issues, policy change, security and updates.

#### Improve Revenue and Retention

- » Captivate customers with compelling promotions via mobile, IP phone, SMS, PCs, etc.

#### Improve Transparency and Accountability

- » Generate real-time reports consisting of auditable record of open, acknowledged and closed issues.

The key components that contribute to *measurable* improvements in customer satisfaction

### 1. Quick and easy way of reporting issues

- » Simple to use, web interface to raise tickets
- » Pre-saved scenarios to choose from, for known issues
- » Add additional notes to the ticket
- » Verify ticket is created

### 2. Raising immediate awareness and visibility of the issue to all relevant stakeholders

- » Instantly and automatically notify relevant people of new ticket
- » Relevant people are a predefined group selected based on the type of issue, the store where the issue was raised, or other criteria
- » Recipients are notified through immediate and preferred mediums, such as SMS message and/or a phone call

### 3. Providing clear call to action to resolve the issue

- » Relevant information is relayed through the notification (e.g. SMS message and/or phone voice message)
- » Additional notes about the issue may be converted to audio message using Benbria's text-to-speech feature

### 4. Ability to acknowledge ticket by the person responsible

- » Designated recipient(s) acknowledge the ticket instantly through the same medium, i.e. SMS reply or digit press on the phone call
- » All acknowledgements are recorded, tracked and time stamped in central system

### 5. Resolve the issue and provide immediate feedback that issue is resolved

- » Designated persons close tickets that have been resolved (e.g. store manager)

### 6. Ability to verify issue has been resolved

- » Authorized persons verify issues have been resolved
- » Area or district managers can see all stores under their jurisdiction, how many issues remain open, how many are closed, etc.

### 7. Reporting on all issues, time to acknowledge and time to resolve

- » Enable senior management to metric and report on trends, such as time to acknowledge, time to resolve, and number of open, acknowledged, and closed issues, and issues by store, region, or another criteria.
